THE IMPLEMENT RANGE – CHAIN HARROWS & ROLLERS

Chain Harrows

CTM offer a range of chain harrows to be either dragged behind your tractor or quad bike, as well as frame-mounted chain harrows which lift on the 3-point linkage, thus being easier to move from field to field. The added advantage of the frame-mounted harrows is that they can be lifted and backed into corners and difficult areas where it would normally be hard to drag a set of harrows. Lifting mounted harrows using the tractor hydraulics makes them easy to clean out if clogged as well as being able to transport easily for storage when not in use.

6ft Mounted Chain Harrow : £495
6ft Drag Harrow : £295

Rollers

The 5ft ballast roller is a heavy-duty roller, suitable for compact tractors. The barrel is made from 10mm thick steel, mounted on wooden blocks rather than bearings, for sustainable use for many years.

Complete with adjustable scraping blade, jack leg and ball hitch for fitting to various types of vehicles. Weighing just over 200kgs empty, it can be ballasted to increase its weight.

5ft Ballast Roller : £650

All prices quoted are ex-works CTM and are subject to VAT at the current rate.
